CAREER OVERVIEW

A results-driven **Full-Stack Developer** focused on building efficient applications with clean, maintainable code. Skilled in **React, Node.js, and Flutter**, with expertise in **API development, database management**, and seamless integration across **web and mobile platforms**. Experienced in **backend optimization, system security**.

SKILLS

Languages: C, Java, JavaScript, TypeScript, Dart, HTML5, CSS

Frontend: React.js, Redux, Next.js, Tailwind CSS, Babel, Vite, Flutter (Mobile App Development)

Backend: Node.js, Express.js, REST APIs, MongoDB (Mongoose, NoSQL)

Tools: VS Code, Eclipse, Android Studio, Git, Postman

EXPERIENCE

Software Developer - Trainee

Nov 2024 – Present

Loop International Express

Remote

- Developed a multi-step seller onboarding system, integrating **GST verification API** to automate verification, significantly reducing manual effort.
- Engineered a **product management system**, enabling sellers to efficiently add, update, and manage inventory while ensuring seamless database integration using **MongoDB**.
- Designed and secured **APIs** with **JWT authentication**, implementing **role-based access control (RBAC)** to ensure secure authorization, data integrity, and protection against unauthorized access.
- Developed and delivered a **cross-platform mobile app** (Android & iOS) using **Flutter and Dart**, integrating web functionalities for a seamless mobile experience.

PROJECTS

AI-Powered Image Generation Platform | *React.js, Node.js, OpenAI API*

Feb 2024 – March 2024

- Developed a **web app** using React.js and Node.js, enabling users to generate high-quality images from text prompts.
- Integrated **OpenAI's API** for image generation, ensuring quick and responsive results.
- Deployed frontend on **Vercel** and backend on **Render**, handling daily requests with less than **2s latency**.

Rental Listing Platform | *React, Node.js, Tailwind*

May 2023 – June 2023

- Built a **frontend application** with **HTML** and **CSS** that allows users to filter rental properties by **price and location**.
- Integrated **Google Maps API** to help visualize property density in specific areas, providing a better user experience.
- Designed **responsive UI components** ensuring a seamless experience across **desktop and mobile platforms**.

EDUCATION

B.Tech in Computer Science and Engineering

Grade : O

Vignan Institute of Technology and Management(VITAM)

2020 - 2024

Intermediate

Grade : C

Hinjilicut Autonomous Science College

2020 - 2024

Matriculation

Grade : B

De Paul School

- 2018

CERTIFICATIONS

Developing Front-End Apps with React - IBM | Event Handling, State Management

Bits and Bytes of Computer Networking - Google | Network Layers, Security Basics, Problem Solving

Introduction to Cloud Computing - IBM | Service models, Architecture, Cloud Encryption, Cloud storage
